Advantages of LED Lighting

- **Voltage:** With the Lower voltage, 1.9-4V per LED, makes its lifespan longer than the traditional high voltage lamp .
- **Efficiency:** High efficiency. For now, it reaches 161lm/W for the good quality LED Chip, makes it become the highest efficiency lighting products.
- **Shock Resistance:** LED is Solid State Lighting, which makes it with best shock resistance and stability and very low Lumens Depreciation.
- **Response Time:** LED lighting lights up and off in nanosecond, which is the fastest in all lighting products in responding time.
- **Pro-environment:** Metallic Mercury in traditional light is harmful to human beings and environment, which is not included in LED lighting products.
- **Color:** LED lights up with pure color and covers the whole all visible light wave band, in the meanwhile, it can be any color visible light combining with RGB color.
